DATAMATICS

TruDocs

The GenAl-powered True Data Mining Solution for Your Data Reserve

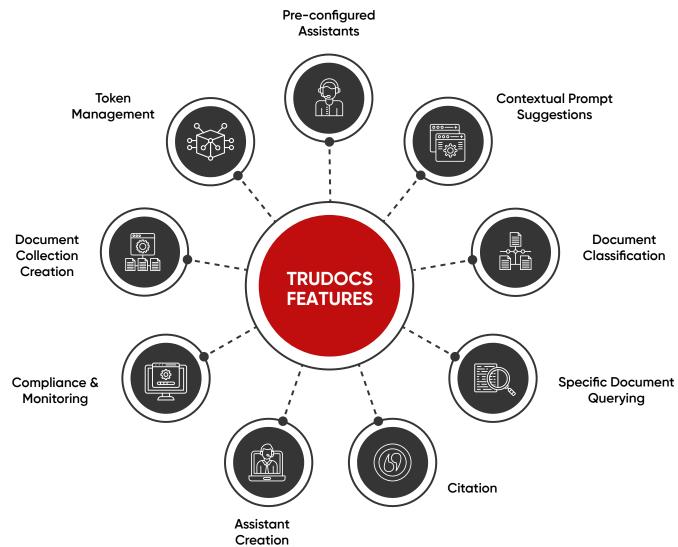

Move away rule-based legacy chatbots limited to simple queries and LLM based virtual assistants that hallucinate when devoid of accurate training!

TruDocs, the true data mining solution, goes beyond the limitations of modern and legacy chatbots and offers dynamic, context-aware, and adaptive responses by leveraging your own structured large datasets in a secure environment.

TruDocs is highly scalable and leverages GenAl and Natural Language Understanding (NLU) for handling complex queries that impart self-learning capability to the solution.

It seamlessly integrates with different large datasets and supports multiple languages during querying to deliver highly accurate outcomes. It uses predictive analytics and contextual understanding for generating insights.

TruDocs Use Cases

Claims processing: Retrieve specific data from databases for validating claims.

Customer support: Refer single-source-of-truths to generate hallucination-free responses.

HR: Access information at the finger-tips to fulfil HR-Operations requirements.

Operations: Support business operations with accurate data at the right time.

Procurement: Access agreements and contracts to retrieve the required data.

Legal: Access specific clauses from legal repositories during drafting responses.

IT: Refer to statutory documents and retrieve information as required.

TruDocs Advantages

Search for required information from within the document and different document stacks.

Avail multi-lingual querying in a device-agnostic and highly secure environment.

Monetize enormous volumes of dark data for benefit of the entire organization.

Query in natural language on your own data stacks and retrieve highly accurate responses.

Improve employee and organization productivity by more than 30%.

Avail hallucination-free, cost-efficient data mining solution for customer -facing executives.

Access specific data from huge data stacks across a horizontally & vertically scalable platform.
